Airborne Excellence

Beyond conventional
metal production

BMT AEROSPACE

PRECISION GEARS, GEARBOXES,
TRANSMISSIONS AND ACTUATORS

Our suite of specialised in-house technologies and services allows us to manage every step in your project. We support every customer with a complete, individually tailored service from raw material to end product and beyond. We have manufacturing capabilities in Michigan (US), Belgium and Romania.

- Engineering
- General & gear-specific machining
- Heat treatment, surface enhancement and plating
- Testing and inspection
- Project & supply chain management

We have a 60 year legacy of supplying our gears to almost all major aerospace programs.

Visit www.bmtaerospace.com or contact us for more information.

BMT ADDITIVE

METAL 3D PRINTING

At BMT Additive, we believe in “co-creation”. That means we can support you throughout your aerospace, industrial equipment, transport or marine project, from initial concept to final quality assurance.

- Design
- Additive manufacturing
- Both SLM and EBM technology
- Finishing
- Advanced inspection technology

Visit www.bmtadditive.com or contact us for more information.
